

I'm not robot!

This fingerpicking guitar course covers everything you need to play fingerstyle on the guitar. It's suitable for the complete beginner and works up to an intermediate fingerstyle level - on both acoustic and electric guitars. Fingerpicking is a highly valuable technique to develop and will put you in great shape as you progress through your learning journey. This fingerstyle technique crosses many genres and enables a great level of diversity to your guitar playing. It helps improve finger strength and independence - develops access to a wider mix of musical styles and adds extra possibilities to your own creative expression. We begin with simple picking patterns, which will progress to enabling you to tackle some well known songs. Along the way, we learn a range of fingerpicking techniques and I will encourage you to begin to think about how you could implement these in to your own compositions. I believe that encouraging a student to find their creative voice, is a great approach for further developing confidence and awareness of your own individual and unique musical output. I will also link you to guitar recording and music production software and mention some tips for these areas along the way. There are various chords used throughout, so if you are completely new to the guitar, you may also wish to checkout my first class: "Learn Guitar: The Complete Beginners Guide", which you can find here by searching that title. The class covers every essential topic you need to get up and running on the guitar and has a large emphasis on helping you to develop your own - unique - creative ability. Resources: Lots of PDFs are attached to this course, that contain the tab for each song that we work on - with some extra ones thrown in too, so that you can challenge yourself and continue your learning journey, after working through each lesson that I provide. I've also included documents explaining finger positions and other techniques we cover throughout the class. I wish you all the best with your guitar journey! Good luck! {"tracking_id":939,"is_favorite":false}, {"id":"pdBpa","requirements":"","lesson_count":20,"duration":7934,"level":4,"instrument_id":100000,"topics":[{"id":4,"name":"Music Production","uri":"music-production"}], {"id":6,"name":"Music Software","uri":"music-software"}], {"web_url":"","preview_link":"950?date=1633093234&qt=70","preview_type":"course_image","rating":{"rating":4.830000000000000710542735760100185871124267578125,"count":3,"count_to_visible":0,"user_rating":null},"progress_duration":0,"name":"Sound Design 101: Using Sampling for Music Production","description":"Welcome to the COMPLETE Sound Design Fundamentals Guide! This is a class designed for the average person who is ready to dive in to making music with synthesis! Whether you are a beginning musician, an active musician, or an aspiring musician - this class is perfect for you! In Sound Design Fundamentals: Sampling, we will examine the essentials of Sound Design using Ableton Live and Propellerheads' Reason software and focusing on principals of Sampling. We will explore three fundamental topics: Using samples for generating sounds, and the legal implications of sampling (And two pro tips for avoiding all the legal issues! Using samples to generate new sounds through manipulation and synthesis! Using samplers to control drum sounds and sequence dynamic drum patterns. This system keeps the technical jargon to a minimum and gets you making your own sounds quick. Dr. Allen is a professional musician, top-rated Udemy instructor, and university professor. In 2017 the Star Tribune featured him as a "Mover and a Shaker," and he is recognized by the Grammy Foundation for his music education classes. Throughout this class, if you get stuck, you can review the videos or post a question, and I'll be back to it as fast as possible. Anthony Allen is an Ableton Certified Trainer, and a PhD in Music Composition and master of Electronic Sounds. His music has been heard internationally in film, radio, video games, and industrial sound, as well as the concert hall and theater. And of course, once you sign up any part, you automatically get huge discounts to all the upcoming parts (the next 5!) of this class. You will not have another opportunity to learn Ableton Live in a more comprehensive way that this. Start here! The course is a roadmap to Mastering Sound Design with any software tool. All the tools you need to produce great tracks are included in this course and the entire course is based on real-life experiences - not just academic theory. In this class we learn how to work with the piano roll editor in a DAW to make harmonies, melodies, and whole tracks, and then we expand on those ideas and work with harmonic patterns (harmony) that is more rich than just major and minor. This class is taught by J. Anthony Allen, who literally wrote the book on this topic. In DAW While Ableton Live is used in this class, the concepts are easily adaptable to any and all music platforms. So if you use Logic, FL Studio, Reaper, Pro Tools, LMMS, or any of the other DAW programs, you will have no trouble following along. Production Techniques Through Theory The most important part of this class is an extensive foray into using these techniques in actual tracks. I'll be creating 9 tracks through this class, right along with you, each using a different technique so you can see exactly how I incorporate it right into my music. Full Sessions After each production project, I'll give you the whole session of what I made using the techniques for you to play with. You can download it, expand on it, re-work it, and even release it as your work. If Your Music is Missing Something, This is Probably It. If you are finding that you are writing track after track, and while they sound good, there is something they are missing - then this is it. You are missing the sense of harmony that professional producers have. In this class, I'll arm you with all the tools you need to produce those tracks just like you imagine them. Who should take this course? Anyone interested in producing their own music. This will get you up and running and give your tracks a unique sound in no time. Structure This course consists of video lectures, which all contain a session in Ableton Live 9. If you are using a different program (or none at all), no worries! This isn't a class on how to use Ableton Live, and the concepts can be applied to any DAW. In this course, we will cover: Bass Lines Modes Producing with Modes Pentatonic Scales Chromatic Mediants Producing with Chromatic Mediants Exotic Scales Producing with Exotic Scales... And much more!! The course is a roadmap to finding the missing piece in your tracks, or just getting started making great tracks. And of course, once you sign up any part, you automatically get huge discounts to all the upcoming parts of this class.
